

In-Line Filter Cartridges

Post In-line filters filled with Coco nut shell are design to reduce unwanted odor, taste, and chlorine, improved taste. Choice of polypropylene media used for sediment removal. In-line filters are an ideal choice of final polishing filter in home reverse osmosis drinking water systems, ice maker, and food service application. Martin GAC post In-line filter comply with NSF Standard.

Feature

- Efficient removal of chlorine and organic chemicals
- Improve the taste of water
- Installation eliminates the need for additional filter housing
- Competitively priced carbon filters
- Ideal for residential and commercial applications
- All in-line filters include a pre- and post-filter

Application

- Pre and post RO
- Refrigerator
- Ice maker
- Drinking water purify

Specification

Type		GAC,T33; PP-S	
Inlet & outlet		Jaco, Quick connector	
Dimensions	Length (in)	6",10"	12"
	OD: (in)	2"	2.5"
	Inlet & Outlet	1/4" NPT or Quick connector	
Materials	Media	Coconut Activated carbon, Polypropylene melt blown, Hollow fiber membrane	
	Inlet/outlet	Polypropylene
